

Sand Banks Resort at Treasure Cay, Abacos, The Bahamas

Location: Treasure Cay, Abacos, The Bahamas

Client: Tim Blakely

Size: 13 acres

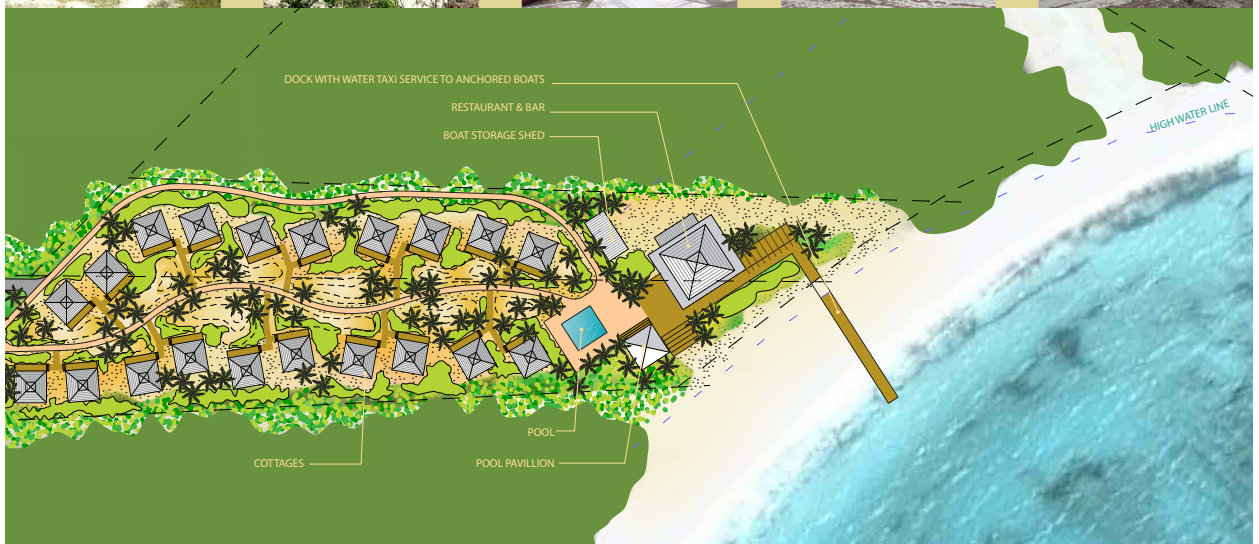

Cost: Estimated Total Project \$17 Million

Status: On hold

Viridian Landscape Studio developed schematic plans for the Sand Banks Resort at Treasure Cay. The site provides a luxurious retreat set in a stunning tropical beach environment. The plan includes a tennis court, infinity pool, spa, restaurant with ocean views, cottages and unique bone fishing lodges. In response to site conditions, cabanas with decks are nestled within a lush, tropical landscape and elevated for privacy and storm response. The gym and spa have decked outdoor areas for yoga classes within nature. A new dune protects the development from the sea, buffers the public beach and adds topographic interest. Native plants secure dunes and the community is stepping forward to remove invasive species and reforest previously cleared areas. These and other sustainable design initiatives make this a resort with an “amplified eco twist” that benefits man and nature.

THE SAND BANKS CLUB AND SPA ADJACENT TO TREASURE CAY, ABACO, BAHAMAS

Portion of plan: Cabanas are nestled into a restored lush tropical landscape.
